Summary from guidance meeting with Folke Haugland 11.04.2011

Tests show that it will be beneficial to make a query splitter and a query joiner. We had a meeting with Jaran where the consensus was to implement this. We have made some changes in the gantt diagram where we specifies these changes. We have added schedule for query splitter, result joiner and changed the time limit for test results. Query splitter and result joiner are from 08.04 to 06.05, and test results from 27.04 to 12.05.
